The screenshot shows the 'Oracle Universal Installer: Specify Home Details' window for Oracle Database 11g. The window title bar includes the Oracle logo and version '11g'. The main heading is 'Install Location'. Below this, there is a paragraph explaining that the user should specify a base location for Oracle software and configuration files, which will be the Oracle Base directory. A text input field labeled 'Oracle Base:' contains the path '/d04/oracle/obiee', followed by a 'Browse...' button. The next section is 'Software Location', with a paragraph explaining that the user should specify a base location for Oracle software files separate from database configuration files, which will be the Oracle Home directory. This section has two input fields: 'Name:' with the value 'OraClient11g_home1' and 'Path:' with the value '/d04/oracle/obiee/product/11.1.0/client_1', each followed by a 'Browse...' button. At the bottom of the window, there are several buttons: 'Help', 'Installed Products...', 'Back', 'Next', 'Install', and 'Cancel'.

Oracle Universal Installer: Specify Home Details

ORACLE 11g
DATABASE

Install Location

Specify a base location for storing all Oracle software and configuration-related files. This location is the Oracle Base directory. Create one Oracle Base for each operating system user. By default, software and configuration files are installed by version and database name in the Oracle Base directory

Oracle Base:

Software Location

Specify a base location for storing Oracle software files separate from database configuration files in the Oracle Base directory. This software directory is the Oracle Home directory. Change the defaults below either to specify an alternative location, or to select an existing Oracle Home

Name:

Path:
