## About patchsets.sh

Although \$AD\_TOP/sql/adutconf.sql will give the patch level information, if at all you need family pack level you need to use patchsets.sh

Note: 139684.1 - Oracle Applications Current Patchset Comparison Utility - patchsets.sh

## **Purpose**

This program (a unix shell script) was created to help customers evaluate the currently installed Oracle Applications' patchsets and Family Packs. The program compares the currently installed patchsets and family packs to the most recently available ones generated by Oracle Development.

Download the latest patchsets.sh from the below site

[ftp://ftp.oracle.com/support/outgoing/PATCHSET\\_COMPARE\\_TOOL/patchsets.sh](ftp://ftp.oracle.com/support/outgoing/PATCHSET_COMPARE_TOOL/patchsets.sh)

PATCHSET - To Know patch levels and also family patch level (uses AD\_APPLIED\_PATCHES, AD\_BUGS)

1> copy patchsets.sh to \$APPL\_TOP/admin/VIS

Go to APPL\_TOP directory mkdir tmp  
cd \$APPL\_TOP  
mkdir tmp

2> cd APPL\_TOP

run the environment file

3> cd \$APPL\_TOP/admin/VIS

sh patchsets.sh connect=apps/apps@VIS patchlist=ad\_applied\_patch

4>cd \$APPL\_TOP/admin/<SID>
