APPS DBA INFO

➤ **How to get the current Patchset level of Oracle Applications products in R12?**

There are many methods to find out the current patchset level of oracle application products.

Method 1:

Step1 : Login to OAM

Step 2: Navigate: Support Cart -> Applications Signature -> Collect -> Check "Product Information" box -> Click on "View" (eyeglasses)

This will show the following patchset information :

Application Name
Current Patch Level
Product Version
Status (Installed, Shared Product, Inactive)

Method 2:

The patchset level information can be retrieved directly via sqlplus with the following diagnostic script :

```
$AD_TOP/sql/adutconf.sql
```

➤ **How to collect configuration information for HTTP, OC4J and OPMN in R12?**

We need to do the following on ALL middle tiers as the application tier user.

```
zip -r /tmp/`uname -n`_`date +%m%d%y.%H%M`_iAS_CONFIG.zip \  
$ORA_CONFIG_HOME/10.1.3/Apache/Apache/conf \  
$ORA_CONFIG_HOME/10.1.3/config \  
$INST_TOP/pids/10.1.3/Apache \  
$ORA_CONFIG_HOME/10.1.3/j2ee/ \  
$ORA_CONFIG_HOME/10.1.3/javacache/admin \  
$ORA_CONFIG_HOME/10.1.3/network/admin \  
$ORA_CONFIG_HOME/10.1.3/opmn
```
