➤ **Steps to Stage the Oracle EBS R12 software.**

Step 1 : The installation file system must contain a directory, StageR12, into which the downloaded files will be unzipped. The file structure under that top-level directory will be automatically created when the files are unzipped.

```

C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.
C:\Documents and Settings\MAA TARINI>d:
D:\>cd StagingArea
D:\StagingArea>mkdir StageR12
  
```

Step 2 : We create a batch script to unzip the zip files automatically. Here is the batch file, we just run this file and the stage will be created on our designated location.

```

File Name: CreateStage.bat
unzip -d D:\StagingArea\StageR12 V15668-01_2of3.zip
unzip -d D:\StagingArea\StageR12 V15668-01_3of3.zip
