## **Forms Runtime Diagnostic(FRD)**

### ➤ **Steps to take FRD trace in 11.5.10 in 11i**

1. Login to application tier as user APPS.
2. Login to System Administrator Responsibility in Oracle Applications.
3. Add the following profile to the USER LEVEL as follows

ICX: Forms Launcher = <http://erp.com:8000/dev6ocgi/f6ocgi?&record=collect&log=testing.log>

4. Logout and Log back in again, for this profile to take effect. When we login again, a message box pops up, which alerts us that Diagnostics is enabled.
5. Reproduce the Forms-Issue.
6. Exit the application.
7. Locate the file in the directory set by variable \$FORMS\_TRACE\_PATH.

### ➤ **Steps to take FRD trace in 11.5.10 in R12**

1. Login to application tier as user APPS.
2. Make the USER value for profile option 'ICX: Forms Launcher' the same as the SITE value.
3. Append the USER value of ICX: Forms Launcher with the "?record=collect" , as shown below and save this at the user level.

<http://erp12.com:8000/forms/frmservlet?record=collect>

4. Logout and Log back in again, for this profile to take effect. When you login again, a message box pops up, which alerts you that Diagnostics is enabled.
5. Go to Help->About Oracle Applications, go to the section 'Forms Server Environment Variables'

We will get a value in FORMS\_TRACE\_DIR. Note down the value.

6. Reproduce the Forms-Issue.
7. Locate the file in the directory noted in FORMS\_TRACE\_DIR.

**Please Note:** By default, this directories named as forms\_[pid].trc where pid is the process identifier.

Collect `_[form_process_id]`
